Environmental Sculpture

Materials: newspaper
masking tape

Purpose: To construct a freestanding environmental structure. The building process will depend on the support of the individual community members involved. Each member's participation will have an effect on the end result.

Directions: Invite interested individuals to participate in an ongoing building experience and explain the purpose and process, answering any questions.

2. Demonstrate ways paper can be utilized to create supporting additions, i.e. paper can be:
   a) rolled like logs and taped
   b) rolled into tubes
   c) accordion pleated
   d) folded into shapes and taped

3/ Discuss with participant how and where their additional building block can be added in support of the structure.

4. Optional creativity is encouraged. The paper can be used in any way except for pieces being torn off. No scraps please.
